APPLIED MATHEMATICS AND COMPUTATION

VOLUME 69

MASANORI SUGISAKA AND SUEO UENO
Introduction: Special Issue on Adaptive Filtering and Estimation 1

G. I. MARCHUK AND V. I. AGOSHKOV
Reflection Operators and Contemporary Applications to Radiative Transfer 3

O. I. SMOKTY AND K. Y. KONDRATYEV
The Analytical Approximation of the Spatial Frequency Filtration of Radiation Fields for the Space Spectrophotometry Problems 23

Y. KAWATA, S. UENO, AND A. OHTANI
The Surface Albedo Retrieval of Mountainous Forest Area from Satellite MSS Data 41

SUEO UENO
Probabilistic Approach for Rarefied Gas Dynamics: Linearized Couette Flow 61

HARRIET H. KAGIWADA AND ROBERT E. KALABA
Fuzzy Evidential Filter for Detection and Tracking of Dim Objects 75

JINGMIN XIN AND AKIRA SANO
Adaptive System Identification Based on Generalized Wavelet Decomposition 97

MASAYUKI KAWAMATA, EIICHIRO KAWAKAMI, AND TATSUO HIGUCHI
Separable-Denominator Two-Dimensional Adaptive Filters with Application to Noise Reduction in Images 111

MASANORI SUGISAKA AND TAKEMASU OKADA
Continuous-Time Chandrasekhar Smoothers in Detection and Tracking 123

MASANORI SUGISAKA
Adaptive Chandrasekhar Filter for Linear Discrete-Time Stationary Stochastic Systems 137

(Continued)

A. M. El-Naggar, A. M. Abd-Alla, and S. M. Ahmed
On the Rotation of a Non-Homogeneous Composite Infinite Cylinder of Orthotropic Material 147

O. Ibidapo-Obe, A. B. Alonge, and Adedeji Badiru
On Active Controls for a Biped Mechanism 159

Sheldon H. Jacobson
Analyzing the *M/M/*1 Queue in Frequency Domain Experiments 185

Mark Finkelstein
Estimating the Frequency Distribution of the Numbers Bet on the California Lottery 195

Ahmet Z. Sahin, Davut Kavranoğlu, and Maamar Bettayeb
Model Reduction in Numerical Heat Transfer Problems 209

Narendra S. Goel and Bo Shen
Symbolic Computation Using L-Systems II: Extensions 227

M. H. Hamdan and R. A. Ford
Single-Phase Flow through Porous Channels Part II: Flow Models, Critical Length, and Viscous Separation 241

Rekha Srivastava
A Note on the Epstein–Hubbell Generalized Elliptic-Type Integral ... 255

W. Layton and W. Lenferink
Two-Level Picard and Modified Picard Methods for the Navier–Stokes Equations 263

Y. Huang and N. G. Zamani
Design Optimization via Finite Elements: An Elementary Account ... 275

Abdul-Majid Wazwaz
The Decomposition Method for Approximate Solution of the Goursat Problem 299

Darrell G. Moss and Haym Benaroya
A Discrete Inverse Vibration Problem with Parameter Uncertainty ... 313

A. Eskandari, P. Ffolliott, and F. Szidarovszky
Uncertainty and Method Choice in Discrete Multiobjective Programming Problems 335

Alberto Cabada
Erratum: Remarks on The Monotone Method for First-Order Problems with Linear and Nonlinear Boundary Conditions 353

Volume Contents
